

“STAPPY”

INNOVATIVE PLUG FOR ALL BOTTLES OF WINE AND SPARKLING
AUTO STAPPANTE - Reuse - ECOLOGICAL FOOD IN POLYETHYLENE

STAPPY, unscrewing a common screw cap, to facilitate the opening, if you had little strength in the fingers or because it was inserted in a bottle with non-standard 18 mm hole. but smaller, you should proceed in this manner:

Tighten the nut between the thumb and forefinger STAPPY way of Nutcracker, then with his right hand unscrewing the bottle clockwise to eject the capping part for about 1 cm

This is how the ring twist completed.

As you can see, the board "Save the dirt" of the ring STAPPY, yet cover the mouth of the bottle

To free the mouth of the neck from the edge "Save the dirt" of the ring STAPPY, it must still take the bottle and screw the nut clockwise.

Now you can open the bottle with the usual "traditional" and "ritual" hand gesture, a gesture that no other screw cap gives you the chance to do.

STAPPY, needs no special capping machine, simply insert it firmly into the bottle.

For industry or the cellars, the cap, the capsule, the cage for bottles of sparkling wine, apply with the same machines and capping machines used to insert the cap "mushroom plastic."

STAPPY è coperto da brevetto internazionale dalla:
